

Online Safety for Parents - E-learning training course

A useful and easy to follow guide for parents who want to understand the way their children use the internet and keep them safe on line.

Simple, engaging and interactive with a Do & Don't format, designed to promote conversation and instil confidence even in absolute beginners.

The course winds up with a thought provoking true or false quiz to help you think through your own behaviour and better understand the way your children think about on line safety.

Topics covered include:

- Recognising the impact of your digital footprint
- Setting boundaries for yourself and your children
- Reacting appropriately when things go wrong
- Promoting safe and responsible on-line habits for everyone
- Discussing and dealing with cyber bullying.

Ideal for any parent who wants to encourage an open and honest conversation about a family wide responsible approach to internet safety and personal security.
