

Immediate Management of Anaphylaxis

Aim

To enable participants to recognise and treat anaphylaxis safely and effectively.

Target Group

This training is for qualified first aiders and is suitable for all health and/or social care setting professionals as well as those in a high risk environment where such medication is available.

Delivery method, venue and duration - date(s) to suit you

- EITHER face-to-face in your own training room over a half-day
- OR virtually using Zoom or MS Teams over a half day
- *This topic can be covered perfectly well in half a day, so you might wish to have two half days (not necessarily the same topic) on the same day to keep your costs down.*

Learning outcomes: by the end of this session participants should:

- Have an understanding of what anaphylaxis is
- Have an understanding of the legal position on the use of adrenaline
- Know the triggers of anaphylaxis
- Recognise the signs and symptoms of anaphylaxis
- Be competent to use adrenaline auto injectors safely and dispose of sharps
- Be able to handover casualty to medical professional

Training methods used

All of our training sessions, whether face-to-face or virtual, are intended to be as interactive as possible. Participants are encouraged to ask questions, make comments and bring up their own issues. We use lots of different methods including quizzes, case studies, video clips and small group work as well as direct teaching. We want participants to leave the session saying “that was really enjoyable - and it was directly relevant to my working life.”

Accredited Level 3 Award in Immediate Management of Anaphylaxis

We are also able to offer the accredited Level 3 Award in Immediate Management of Anaphylaxis - as well as the learning outcomes above, the Level 3 award covers scene survey, conducting initial assessment, action in an emergency, CPR and resuscitation. The course is a full day face to face.
